Team KOREA's selection procedure

KYPT(Korean Young Physicists' Tournament) organized by the organizing committee of KYPT is held annually in late January or early February with the financial support from Korea Foundation for the Advancement of Science & Creativity. Committee members of KYPT are recommended from the Korean Physical Society and the Korean Society for the Gifted.

Fore KYPT, 14 out of 17 IYPT problems are announced in September and each registered team is required to submit a written progress report by mid-December. Evaluating the progress reports and interviewing selected teams in order to vet physics knowledge and English fluency, 20 or 24 teams are chosen for KYPT. The number of teams applying for KYPT is significantly dropping year by year for KYPT 2012 to 35 teams for KYPT 2022. The trend seems to be a reflection of the recent policy of the government that awards in extracurricular competitions are not to be considered for college admissions.

KYPT is held in late January or in early February. KYPT consists of 4 rounds of physics fights and a final. The rules of KYPT are the same as those of IYPT.

After KYPT, the organizing committee launches a selection procedure of the national team of KOREA participating in IYPT. Only the members of the elite eight teams of KYPT are given the chance to apply for the national team. Selection of the members of the national team is finalized in April.
