## **Selection Procedure of Team China**

Team China members of IYPT are selected from China Young Physicists' Tournament (CYPT) participants. CYPT is an IYPT-based national physical competition among high school students in China. CYPT uses the 17 IYPT problems, and the process is similar to IYPT. The official language is Chinese.

Every year in October, we invited school based teams from high schools all over the country to CYPT, which is held in February next year. So far, there are about 120 schools to be involved. During the tournament, the students' research ability, team working and discussion skills are investigated. They are also interviewed in English to examine their English presentation. Then 12 outstanding students as the Training Team members of China are selected. The 12 members are divided into 3 groups, each group containing 4 students, to do the further research of the problems. Team work and teacher guidance are given via the internet for the students from different regions.

The physics tournament based on the IYPT in school of physics, Nankai University, called NKPT, is held annually in May. The IYPT China Training Team is required to attend NKPT in order to get further development. After NKPT, another interview is carried out to test the students' ability more particularly. According to their performances and student vote, 5 members of team China are selected.
